

TEMEST N65SV: Triolein

FEATURES:

TEMEST N65SV is light ester derived from glycerine and Oleic acid derived from Sun flowers which makes it sustainable and eco-friendly. This emollient has a low spreading ability, and is a light clear liquid with characteristic odour & low viscosity.

TEMEST N65SV is an excellent high-weight emollient, in which, when applied on skin, provides a non-oily, light feel. It works perfectly as makeup remover, and for cosmetic applications where it is necessary to prevent the pore clogging. In hair treatment and hair colors it provides protective and refatting film to the hair .

Recommended for:

- Hair care
- Make-up removal
- Skin care
- Body care

PROPERTIES	TYPICAL VALUES
INCI	Triolein
Appearance	Clear yellow liquid
Saponification Value	189
Colour (Gardner)	4 max
Density @ 25°C	0,905 - 0,920
Refractive Index @ 25°C	1,455 - 1,480
Acid Value	2 max
Iodine Value	90
Hydroxyl Value	< 5
Odour	Typical, fatty

TEMEST N65SV: Triolein

PERFORMANCE & RECOMMENDATIONS

TEMEST N65SV is recommended for greasy skin as it leaves less residue than other emollients. It greatly works in makeup removal cream formulations.

Additionally, it is an excellent shine-enhancing agent for hair care products, useful in many cosmetic formulations, such as hair serum, lip balm, makeup remover, light day cream & hair oil.

Commonly used in hair dyeing creams due to the keratin affinity and its ability to protect the hair against dryness.

Since 2002 temix Oleo is committed to cosmetic industry in providing high quality raw material derived from renewable sources. Environment, Ethics, and Sustainability are our mission.
